Profile

- An undergraduate student in Mathematics and Computer Science with strong interests in Optimization, Machine Learning, and Data Engineering. Experienced in working with large-scale data processing frameworks such as **Apache Spark and Hadoop**. Passionate about **mathematical modeling, problem-solving**, and applying theoretical concepts to real-world problems. Seeking opportunities to engage in academic research and further develop analytical and collaborative skills.

Education

- | | | |
|---|-----------------------------------|-----------------------|
| Hanoi, Vietnam | VNU, University of Science | 2023 – Present |
| <ul style="list-style-type: none">• B.S. in Mathematics and Computer Science. GPA: [3.44].• Relevant Coursework: Linear Algebra, Probability and Statistics, Optimization, Discrete Mathematics, Machine Learning, Database Systems. | | |

Technical Experience

Projects

- **Inventory and Sales Management System** *Link Technologies: ReactJS, Vite, TailwindCSS, [Backend if any]*
 - Developed a web-based system for managing products, orders, and inventory across multiple stores.
 - Implemented CRUD functionalities for product and order management.
 - Designed user interface for efficient data visualization and management.
 - Applied data organization and basic analytics to support business operations.
- **Bus Delay Analysis System** *Technologies: PySpark, Python, Pandas*
 - Processed and analyzed large-scale transportation data using PySpark.
 - Performed data cleaning, feature extraction, and visualization for delay analysis.
 - Developed predictive models to estimate bus delays.
- **Big Data Processing with Apache Spark** *Technologies: Apache Spark, Hadoop, Python*
 - Designed and implemented data processing pipelines for large-scale datasets.
 - Optimized performance of distributed data processing tasks.
 - Applied data-driven approaches to solve real-world problems.

Languages and Technologies

- **Programming Languages:** Python, Java, SQL
- **Frameworks & Libraries:** Apache Spark, Hadoop, Pandas, Scikit-learn
- **Databases:** MySQL
- **Tools & Platforms:** Git, Linux, Docker

Academic Interests

- Interested in Optimization, Machine Learning, and Data Engineering.
- In the future, plan to pursue graduate studies (Master/PhD) and conduct research in optimization and large-scale data systems.
- Seeking opportunities to participate in academic research programs and collaborate on scientific projects.

Activities

- Member of HAMIC (Applied Mathematics Informatics Club), VNU University of Science.
- Participated in organizing the DataFlow 2025 competition, contributing to content development and event coordination.
